

Channel Partner Program

At STL, we pride ourselves on building and fostering partnerships **that last**. We work with you to ensure that your customer is always getting the **best quality** and the **best service** for **the best price**.

Our state-of-the-art **Data Center** also allows us to offer **Backup & Disaster Recovery, Cloud Backup, Cloud Services, and Co-Location Services**.

Leveraging our Data Center's **Security Operations Center (SOC)** and its **advanced security services** provides the edge you need to make your business more successful by offering the services your customers need.

We also have experience working with **Internet Service Providers (ISP)** to provide additional bandwidth through point-to-point fiber connections. ISPs should view STL as a business destination point.

Data Center

Unique to central Illinois, STL's Data Center is a **state-of-the-art, FEMA-rated underground bunker** built to **Tier 3 standards** designed to offer **maximum security** and **system availability**.

We offer solutions to fit a wide variety of tailored mission profiles including **secure, ultra-high available data** and **application hosting, private and hybrid cloud** solutions, **virtual server hosting**, and **backup and disaster recovery**.

No matter the industry, we can explore systems and help close loopholes to ensure coverage from stringent compliance and audit requirements of each of the following: **SOC2, Type-2 HITRUST CSF*, HIPAA, PCI DSS, and SSAE-16** reporting.

Our solutions are backed by **full-service technology support services** optimized to meet client needs, yet **flexible** enough to move with changing business conditions.

Security Operations Center (SOC)

STL's Security Operations Center (SOC) offers proactive, real-time threat monitoring and management to small, medium, and large businesses.

As a trusted **Fortinet® Gold Partner**, STL utilizes the **FortiGuard Indicator of Compromise (IOC)** Automated Breach Defense system. The IOC **continuously monitors** your network for hidden vulnerabilities, persistent attacks, and advanced threats.

Advanced features such as **Mobile Access, Instant Feedback** and a **Real-Time Threat Map** provide our customers with 24-hour accessibility to the real-time status of their network.

Open up new opportunities and create peace of mind for your customers with a **much lower cost** of entry into the market and **less staff** involvement.

Partnering with **STL** will improve your security posture.

Backup & Disaster Recovery

Business operations are protected from any large or small unplanned emergencies.

Cloud Services

Your data. Our servers. Private cloud servers housed in a FEMA-rated, Tier 3 bunkered Data Center.

Cloud Backup

Data protection = Business protection. Proactive backup plan that helps avoid loss of opportunities, sales, and or revenue.

Co-Location Services

Your technology. Our infrastructure and facility. Take advantage of redundant utility power, in-row cooling and hot aisle containment.

I have worked with STL as a Strategic Partner with my own company on many projects.

STL and Wendelin Consulting Group, Inc. share many core beliefs. We treat our customers with respect and never over sell a product or a service.

I am happy to work with STL on future projects and believe there to be a long-lasting relationship with STL.

Jay Wendelin, CEO
Wendelin Consulting Group, Inc.

**One of the few MSPs in North America to have SOC2, Type-2 HITRUST Compliance.*
