Don't Leave Your WINDOWS Open to Cyber-Criminals

Windows® 7

Windows Server® 2008

END OF LIFE
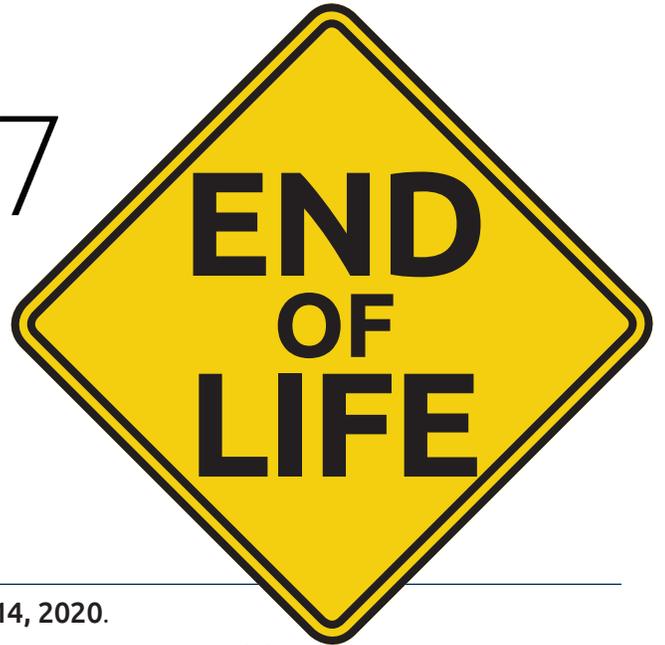

What's Happening?

- Microsoft ends support on **Windows 7** & **Server 2008** on **Jan 14, 2020**.
- There will be **no further** patches or security updates and your systems will be **at risk**.

Why is This Important For My Business?

- These **unsecured** systems can lead to **data breaches**, **liability issues**, and **more**.
- This is a red-carpet invitation to **cybercriminals**.
- Cybercriminals find the systems that are no longer supported and **exploit** them.

What Should I Do?

- Develop a **budget & plan** to replace or update your computers and servers **before** 2020.
- Call us for an **inventory evaluation**.
- **Act Now**...time is moving fast and we want to help you **before it's too late**.

How Can We Help?

- We offer **managed service plans** that will keep your business up and running with the latest technology.
- **Peace-of-mind** for all your IT, Technology, and security needs on a **fixed monthly budget** without the need for hefty out-of-pocket expenses.

Don't Leave Your WINDOWS Open to Cyber-Criminals
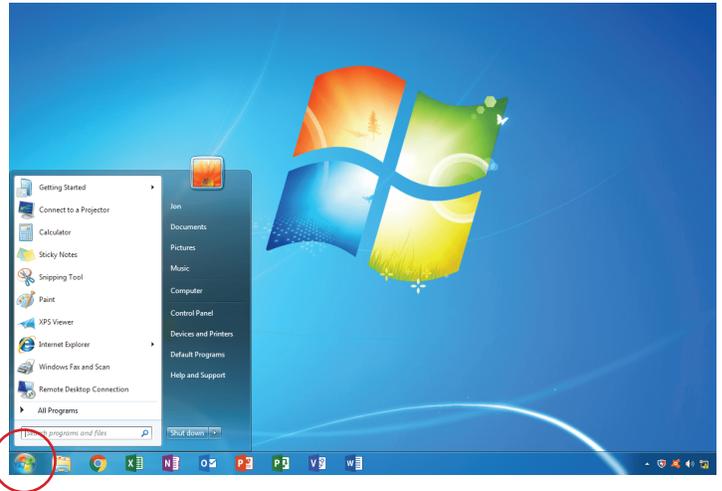

How Do You Know if this Applies to You?

You might wonder what version of Windows you're running and if any of this even applies to you.

So take a look at the **Start** button on the bottom left corner of your computer monitor...

What do you see?

Does it look like the picture on the right? If it does, then you have **Windows 7**.

Don't panic. We can help.

Why Are We Talking About This Now? It's Almost a YEAR Away!

You're probably thinking, "there's time... January 2020 is almost a year away!" The thing is though, it really isn't. Upgrading or changing operating systems is somewhat time consuming and needs to be completed correctly.

Now is the time to start budgeting and planning and **we are here to help**.

As a Managed Services Provider and **Microsoft Certified Partner**, we understand that this transition can be a big deal and that there are many things to be considered.

However, know this, if by **January 2020** you still have even one computer on your network that runs on **Windows 7**, you will be putting your company at unnecessary risk.

This conversion of your network is a BIG endeavor and now is the time to start planning.

STL has committed ourselves to bring this to the attention of all of our partners by offering a **FREE Inventory Evaluation** to anyone interested in gaining an overview of their risk.

We will come to your office and conduct our proprietary **Risk Assessment** to determine what specific computers and servers will be affected by the transition to **Windows 10** and we'll answer any questions that you might have.

To schedule a priority appointment call me at **(309) 661-5705**.

Remember, we're here to help.
