

Remote Solutions for Municipalities

COVID-19 has impacted almost every aspect of life as we know it.

An unprecedented time of social distancing, isolation, and working from home related governmental directives have created new work-related challenges for most businesses, but also for local municipalities.

In-house IT personnel are overburdened with issues that continue to create backlogs that slow down important work for your constituents.

STL's **IT Help Desk** (Remote Support) provides high-speed attention to your issue at hand and is available when you need it the most.

Our engineers are trained to deal with an IT crisis quickly, calmly and expertly—saving you time and sometimes more importantly—frustration.

IT Help Desk/Remote Support

- Access to IT expertise covering every user-related issue you could possibly imagine.
- IT support via phone and remote access.
- Enjoy flat rate, cost-effective service with no hidden fees.
- Reduce overall downtime and increase staff productivity.

Lack of public access to official meetings is another critically important issue that STL has experience with and is prepared to help with—quickly.

Establish Virtual Public Meeting Room

- Work with your team on setting up virtual meetings for the public.
- Build a process to provide instructions for members and for the general public.
- Includes providing IT support for the public.

Basically... We Do **IT** All.

Call us today. Tell us what your issues are and we'll configure a solution to fit your needs—quicker than you might imagine.
